ARTWORK GUIDELINES

Getting your artwork print-ready.

Banana UK Media Ltd
we're a handy bunch to know

1 Send it over

Build your artwork to this guide, then upload it to us.

2 Proof

We'll email you a low-res PDF proof to check.

You're responsible for approving proofs, proofreading and any errors.

3 Approve

All good? Approve it and we print. Need changes? Tell us and resupply the updated artwork.

Building your layout

- Add **3mm bleed** on every edge
- Work at **100% scale**
- Remove keylines, working dimensions and notes
- CNC, routed or acrylic jobs: put the cut path on its own layer named **CUT**
- Want a template sized to your job? Just ask.

File types

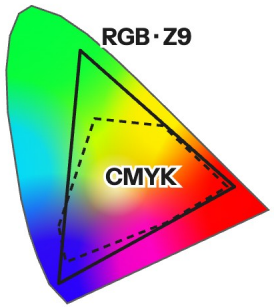

PDF · preferred | AI | INDD | PSD | SVG | EPS

Best of all is a **high-resolution, uncompressed, editable PDF**. We also take Illustrator, InDesign and Photoshop files, plus SVG and EPS.

Embed (or supply) every image at **300 dpi at 100% scale**, and outline or supply all fonts.

NEW Now printing in RGB

Our **HP DesignJet Z9+ Pro** prints straight from RGB. Its wider colour range (gamut) means richer blues, greens, oranges and reds, smoother gradients and truer photos.

Z9 prints (photos, fine art, posters, display): send RGB with its profile embedded, Adobe RGB (1998) or sRGB. Please don't convert to CMYK; it throws colour away.

Latex prints (vinyl, signage, rigid boards): CMYK or RGB are both fine. We'll convert where needed.

Pantone / brand colours: give us the reference and we'll get as close as the process allows. An exact match can't be guaranteed in digital print.

Sending us your files

Secure upload portal

upload.bukmedia.com:9443

Files up to 1 GB each. Drop in whole folders and they keep their structure. Add a note, and you'll get an email confirming what arrived. New client? Ask us for a login.

Under 5 MB? Email it to **help.me@bukmedia.com**

Sharing links from WeTransfer, Dropbox, OneDrive or Google Drive are welcome too.
